

## Event Local Government Scholarship Opportunity!

The Ground Water Protection Council (GWPC) is the national association of state ground water regulators. For the last 28 years, GWPC has hosted the **Annual Forum** which brings together state, federal, and local agency representatives with the responsibility for ground water/drinking water protection, as well as, industry, researchers, and environmental groups in a congenial venue to discuss the latest technology and policy developments. The event provides the opportunity for these groups to foster communication on safeguarding the nation's ground water supplies.

The GWPC, with funding provided by event partners and sponsors, is offering a limited number of Local Government Scholarships to cover full registration to attend the 2011 Annual Forum to be held in Atlanta, GA -- Sept. 24-28. If you are an employee of a local or tribal government agency with interest in ground water protection and sustainability, please submit an application for a scholarship to attend this event.
